- PlayStation 4\*

\*Roadmap 2023

# With **state of the art** technology

Build on the top of state of the art technologies.

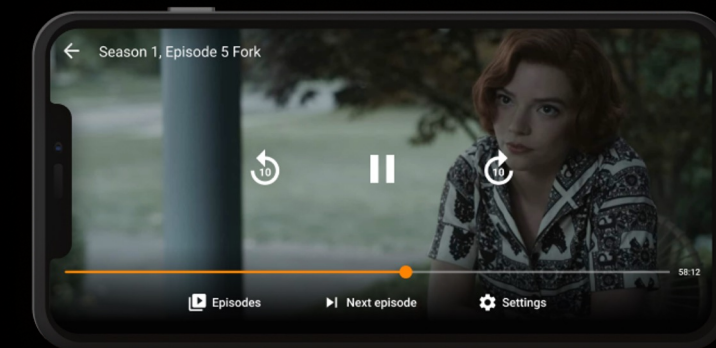

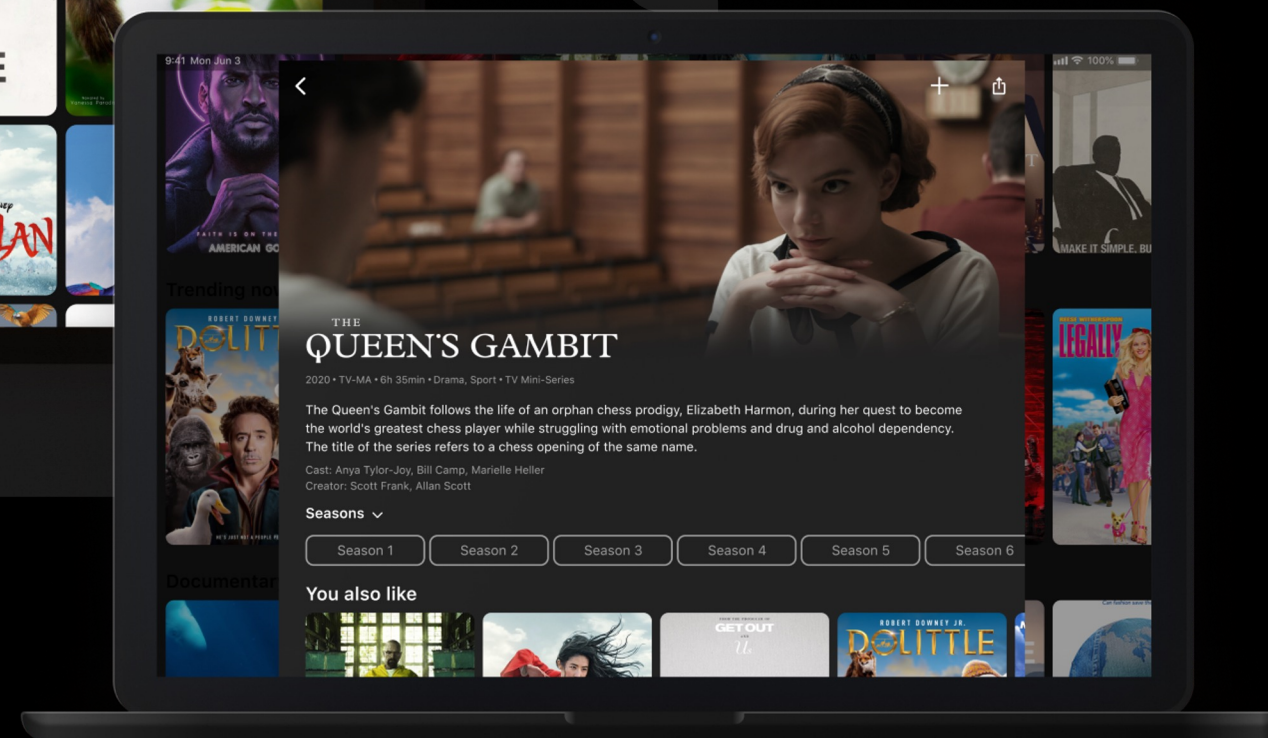

# Where **time to market** matters

Move from an idea to working E2E VOD solution at fraction of the in-house delivery times.

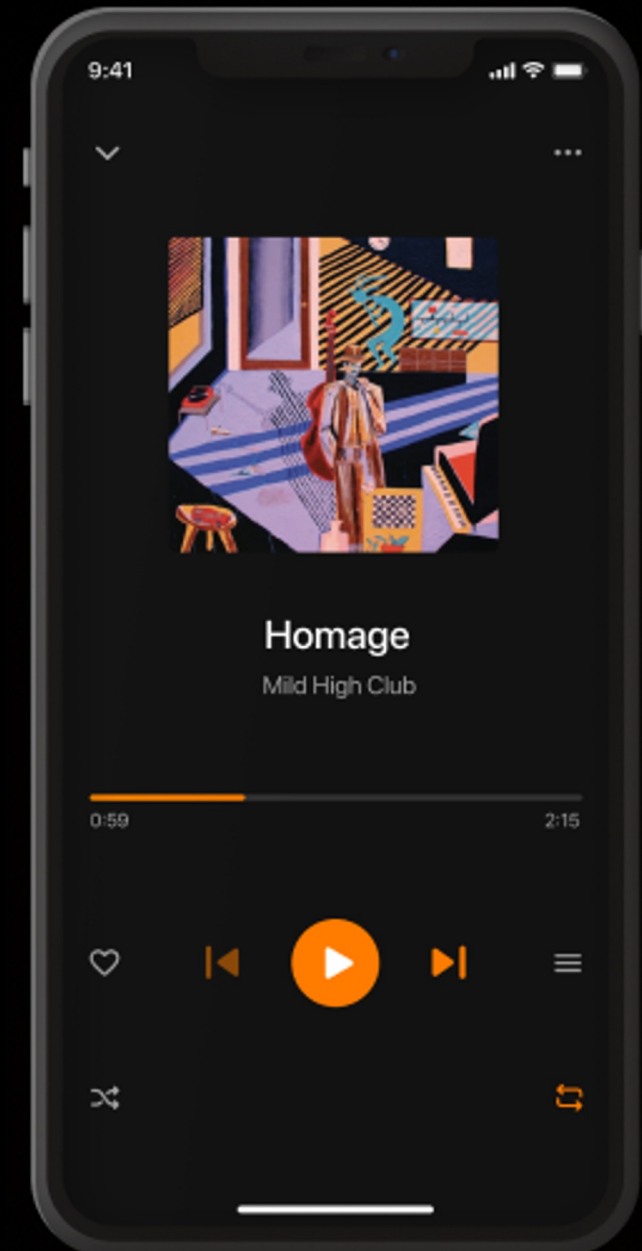

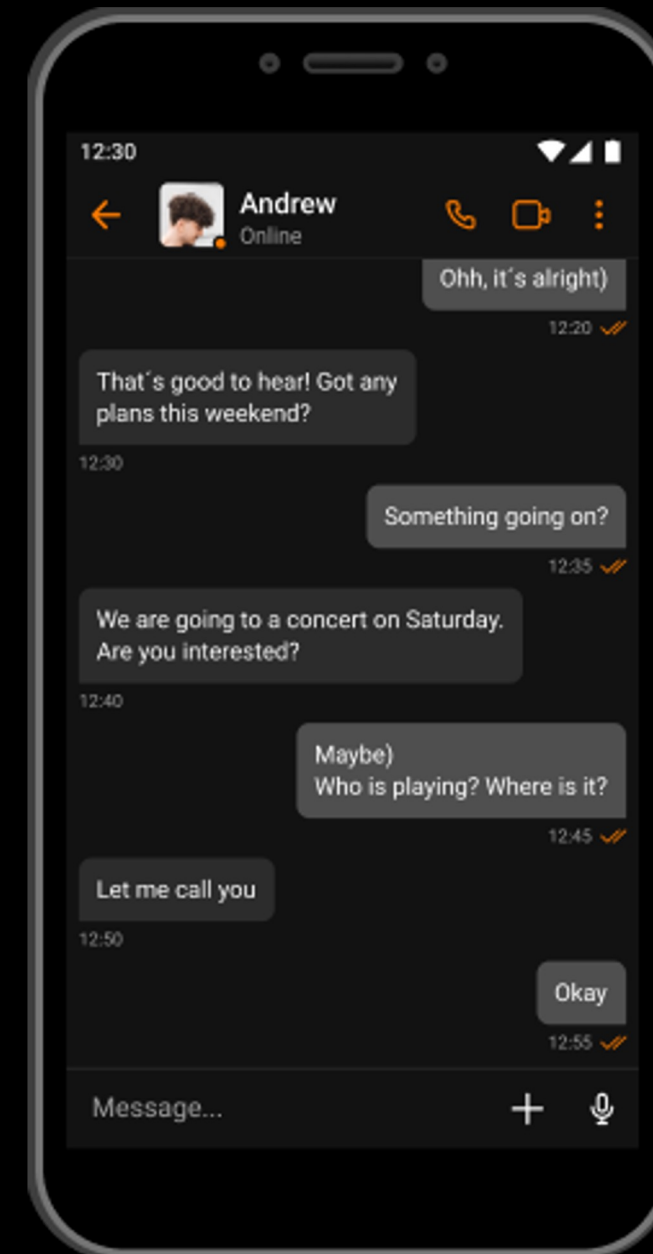

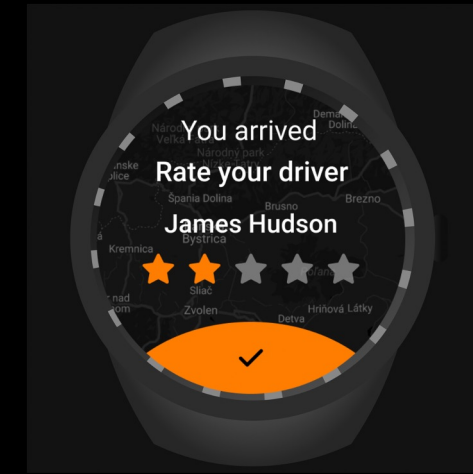

Manage your service via cloud  
In Real-time

# Customisable at every level

Tailor the user experience to your needs.  
No template lock in.

# Infinately **Extendable**

Bring 100+ integrations into your service.

# Scalable vertically and horizontally

Smart small, grow big.

International deployments, scalable SAAS based VOD infrastructure & rapidly deployable clients.

# Data driven

Understand your users and optimise your content delivery based on facts.

# With your content **secure**

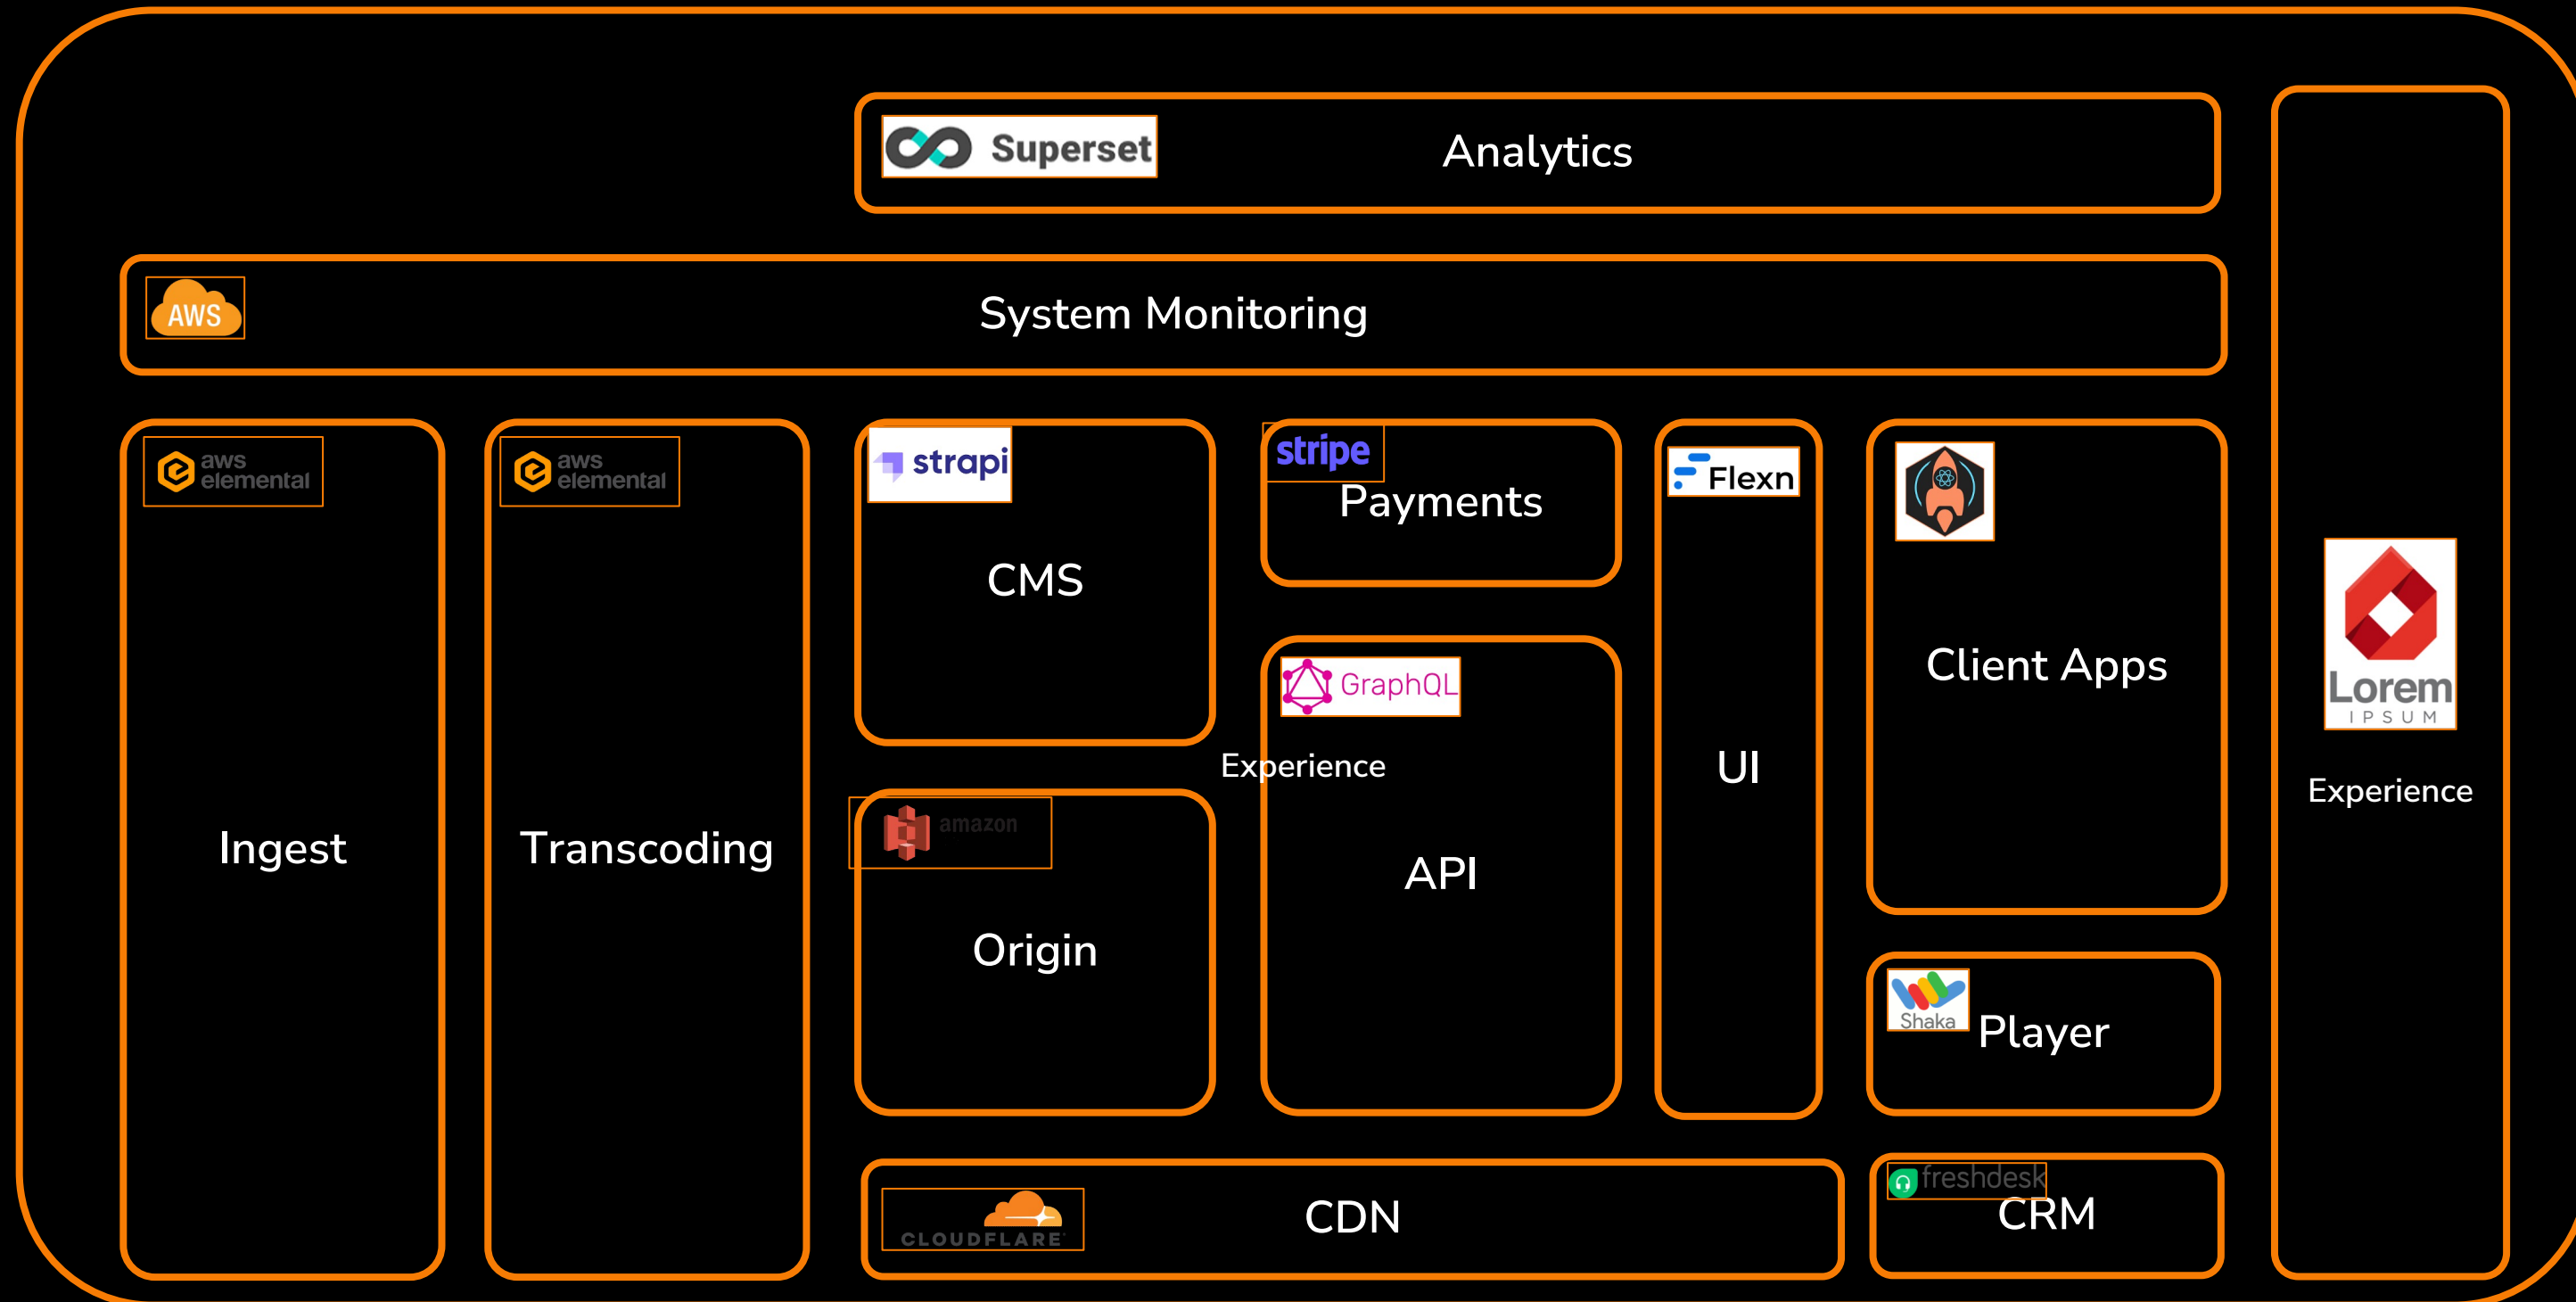

Secure your video content with industry leading security and DRM.

# E2E Solution Overview

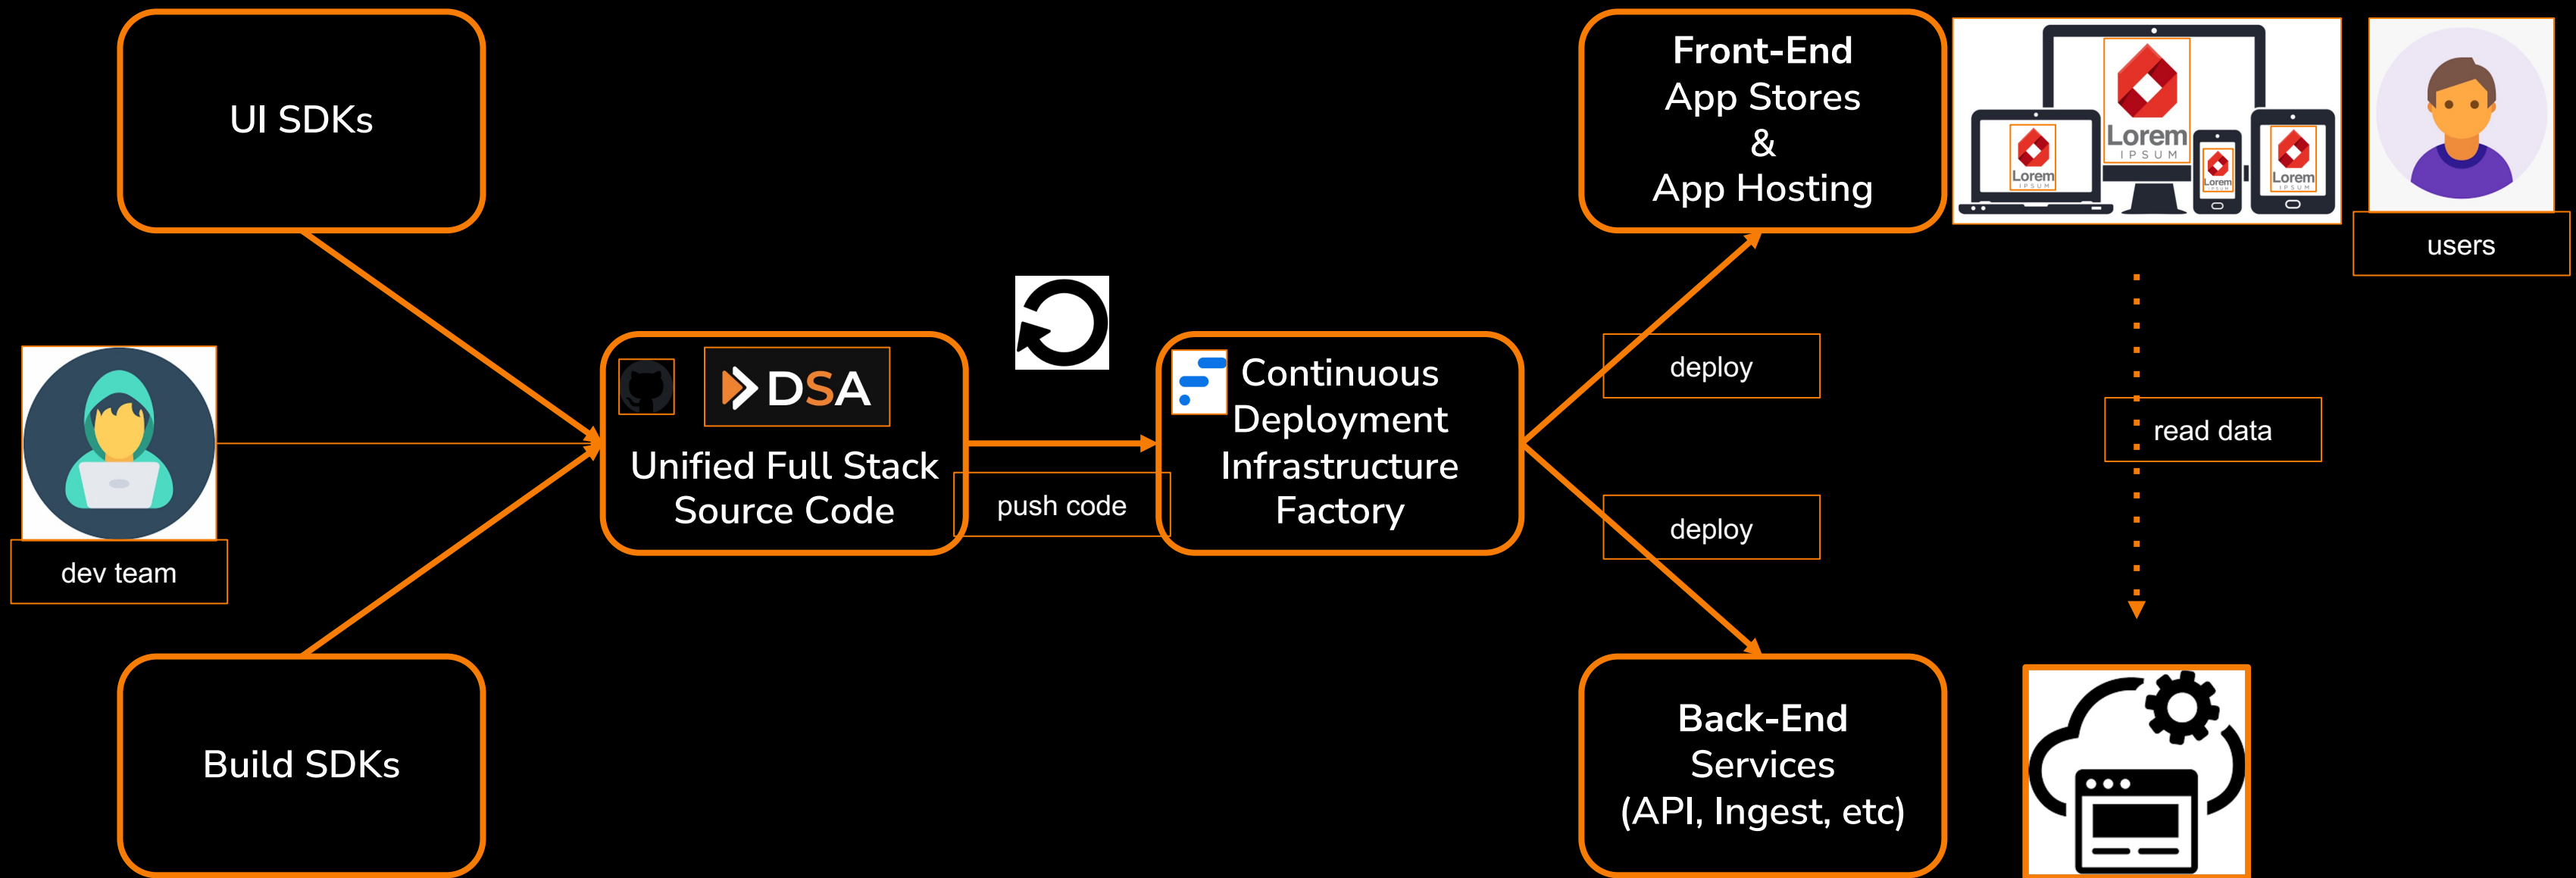

We managed to build full E2E bespoke productised solution from the ground up which brings you the best in class solution.

# E2E Architecture Overview

We are able to deploy full E2E solution update within few minutes and perform automated store submissions making it possible to perform full release life cycle within few hours
